

Tree King™

75 liters slow release watering ring

Ensures good growth throughout the summer and gives the plant a better and deeper root system.

- ✓ Suitable for large shrubs and evergreen plants that have branches down to the ground
- ✓ Heavy 75 liter UV stabilized polyethylene
- ✓ Fast mounting around the tree trunk
- ✓ Fill every 5 to 8 days as needed
- ✓ Empty in 5-8 hours
- ✓ Keeping weeds away around the plant

Instructions and directions

- Tree King™ Watering Ring is placed around the trunk at ground level (see photo)
- Open the filler cap
- Fill the watering ring approx. 1/4 up with a water hose
- Make sure the ring is in a circle without large folds
- Fully fill the watering ring and close the filling lid again
- Refill the bag every 5-8 days as needed
- When filling fertilizer it is important that the fertilizer is completely dissolved
- Rinse the bag once in a while so that the leakage holes in the bottom are prevented from being stopped
- We recommend to remove Tree King™ from October to April
